Scaling New Materials for Net Zero

About

How can we achieve net-zero impacts when scaling new construction materials?

The construction and building industry have a significant environmental impact and is responsible for approximately 40% the annual global carbon emissions. Overall, the industry sees slow uptake in new solutions and building materials. The workshop aims to bring together industry experts from solution provider and established companies to discuss scaling new construction materials and processes to achieve and accelerate the journey to net zero

Workshop Guest Inputs

Nabila Pranoto; Sustainable Construction Specialist Holcim

Thibault Demoulin, Co-Founder & Lead Technology Oxara

Chrissie Muhr, Co-Managing Director & Artistic Director Experimental Foundation

Kika Brockstedt, Co-Founder & CEO Revalu,

Representative from Rematter Earth

Idea and Moderation: The workshop is proposed and moderated by Sasha Cisar, Head of SDG Research & Active Ownership at radicant bank – Switzerland's first digital sustainability bank.

Format: The moderator will frame the discussion with the urgency of the climate crisis and the need for urgent decarbonisation of the real economy. The invited experts will showcase their companies' efforts and contribution towards achieving net zero through new products. The subsequent discussion will focus on the topic of scaling new solutions and how to accelerate the decarbonisation. It will reflect on possible solutions, challenges, collaboration, regulation and the role of finance.

Schedule

Workshops are scheduled from 9:00am -- 16:30pm

Detailed schedules per workshop to be announced soon!
